SUMMARY

Cloud & DevOps Engineer with 1+ years of experience architecting and optimizing production AWS infrastructure on EKS, EC2, and RDS. Expert in executing end-to-end cloud migrations and automating modern Infrastructure-as-Code (Terraform, CloudFormation) alongside CI/CD pipelines (Jenkins, GitHub Actions, ArgoCD). Delivered measurable impact: 70% reduction in deployment time, 30% cost optimization, and 99.9% uptime SLA through proactive monitoring (Prometheus/Grafana/Loki) and self-healing automation. AWS Certified Solutions Architect Associate. Skilled in Linux systems administration, Python/Bash scripting, and Kubernetes cluster lifecycle management.

SKILLS

- **Cloud Platforms:** Amazon Web Services (EC2, S3, RDS, ALB, Route53, IAM, Lambda, CloudFormation)
- **DevOps & IaC Tools:** Terraform, Ansible, CloudFormation, Jenkins, GitHub Actions, ArgoCD, AWS CodePipeline
- **Containers & Orchestration:** Docker, Kubernetes (EKS), Helm, Karpenter
- **Monitoring & Logging:** CloudWatch, Grafana, CloudTrail, Prometheus, Loki, Promtail
- **Networking & Security:** VPC Peering, Kyverno, Security Groups, IAM (OIDC/IRSA), SSL/TLS, DNS, VPN, ALB/NLB
- **Databases:** MySQL, PostgreSQL, Amazon RDS
- **Programming & Scripting:** Bash, Shell, Python

WORK EXPERIENCE

Cloud & DevOps Engineer

Axcess.io

Apr 2025 – Present

Bengaluru, India

- Provisioned scalable AWS infrastructure using **Terraform** and **CloudFormation**, reducing deployment time by **70%**.
- Implemented **EC2 right-sizing**, **Auto Scaling groups**, and custom **S3 lifecycle rules**, achieving a cloud cost reduction of **30%**.
- Deployed and managed containerized microservices on **Amazon EKS** with custom **ALB Ingress**, SSL/TLS certificates, and automated pod scaling.
- Built and maintained continuous delivery **CI/CD pipelines** using **Jenkins**, **GitHub Actions**, **ArgoCD**, and **AWS CodePipeline** for secure automated deployments.
- Enhanced cloud security and isolation by configuring restrictive **IAM roles**, encrypting **Amazon RDS** instances, and establishing custom **VPCs**.
- Orchestrated secure **Azure-to-AWS migrations** using **AWS Application Migration Service (MGN)**, successfully transitioning virtual machines and workloads with zero data loss.
- Ensured **99.9% service uptime** using proactive monitoring via **CloudWatch**, **Grafana**, and **Prometheus**, and reduced incident response times by **35%** through custom alerting hooks.
- Administered and optimized **Linux servers** with custom **Python** and **Bash scripting** to automate system-level operational tasks.

PROJECTS

Kubernetes Infrastructure Modernization & DevOps Platform (Architecture [🔗](#))

Technologies: EKS, Terraform, ArgoCD, Jenkins, Prometheus, Grafana, Loki, Promtail, SonarQube, Trivy, RDS PostgreSQL

- Architected secure, multi-environment **EKS clusters** and highly available **Amazon RDS PostgreSQL** with a **standby replica** using modular **Terraform**, eliminating manual provisioning errors and reducing cluster setup time from **3 weeks to 2 days**.
- Implemented a **GitOps-driven deployment model** with **ArgoCD**, enabling automatic environment synchronization from Git and reducing manual deployment steps by **90%**. Integrated **Jenkins** for CI with **SonarQube** quality gates and **Trivy** vulnerability scanning, catching critical security issues pre-deployment.
- Optimized compute costs by replacing static Auto Scaling Groups with **Karpenter's** just-in-time provisioning, reducing overall compute spend by **20%** while improving pod scheduling latency by **40%**.
- Built a unified observability stack (**Prometheus, Grafana, Loki, Promtail**) with custom dashboards, enabling root-cause analysis in **less than 5 minutes** and reducing **MTTR** by **35%**.
- Secured credential management via AWS Secrets Manager with **IRSA** (IAM Roles for Service Accounts), eliminating hardcoded secrets and reducing security audit findings by **3 critical issues**.

Azure-to-AWS Migration & Containerization Modernization

Technologies: AWS MGN, ECS, Fargate, RDS, CloudWatch, Grafana

- Orchestrated the secure migration of legacy virtual machines from Microsoft Azure to AWS using **AWS Application Migration Service (MGN)**, ensuring **100%** data integrity and completing cutovers with **near-zero downtime**.
- Containerized legacy business applications and modernized deployments by provisioning serverless container workloads on **Amazon ECS with AWS Fargate**, eliminating host management overhead.
- Provisioned highly available **Amazon RDS** instances in isolated private subnets, successfully executing schema migrations and database restores with **minimal read/write interruption**.
- Designed and integrated comprehensive **Grafana dashboards** to visualize system uptime and monitor incident response KPIs, driving a significant boost in operational efficiency and reducing **MTTR**.

CERTIFICATIONS

- **AWS Certified Solutions Architect Associate** – Amazon Web Services [🔗](#)
- **AWS Certified Cloud Practitioner** – Amazon Web Services [🔗](#)

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Karunya University

Coimbatore, 2020 – 2024
